WEDNESDAY 29th APRIL 2015 – AFTERNOON

SHIPPING FINANCE

Time allowed – three hours

Answer any FIVE questions – all questions carry equal marks

Please read the questions carefully before answering

1. A German ship owning company is looking to expand through the purchase of additional vessels. It will raise finance through a syndicated loan.

   Explain:
   a. The structure of a typical syndicated loan
   b. The functions of the parties in a syndicated loan
   c. The typical structure of a KG German financing arrangement (you may use a diagram with brief explanatory notes).

2. Critically evaluate, rather than simply describe, the applicability of the Miller-Modigliani capital irrelevance theory to the international shipping industry. With regard to the shipping cycle, identify and discuss those market factors which indicate an impending shift from one phase to the next.

3. Describe the characteristics of all of the following types of loans:
   a. Moratorium loan
   b. Bullet repayment loan
   c. Balloon repayment loan
   d. Back-ended and front-ended loans

4. Compare and contrast the following four types of shares:

a. Ordinary shares
b. Partly paid shares
c. Cumulative participating preference shares
d. Rights issues

In your discussion you should consider when each type of share may be suitable for a shipping company issuer at each phase of the shipping cycle.

5. Answer all parts of the question:

a. Discuss the various forms of security which may be offered by a shipping company to a bank from which it wants to obtain a loan.
b. If a company comprises several ‘one ship companies’, how does this affect the lender’s perception of risks and how might these risks be reduced?
c. Describe the legal rights of mortgage holders.

6. Describe the possible financing strategies which may be used by a shipping company in anticipation of a long-term downturn in the freight market.

7. Answer both parts of this question:

a. Describe the characteristics of two of the following types of bonds and their suitability or non-suitability for each phase of the shipping cycle:

i. Plain vanilla bonds
ii. Dual currency bonds
iii. Zero coupon bonds
iv. Stepped coupon bonds
v. Freight-referenced bonds

b. Discuss the functions of a sinking fund.

8. Discuss the application of Islamic finance to shipping finance.
